

# RAPID APPLICATION DEVELOPMENT TEAM KONNECT

## APPS FOR EVERY BUSINESS

EMPOWERING  
BUSINESS

Today more than ever, companies rely on a multitude of applications to streamline operations, manage customer engagement and get their business done. Multiple applications also means that departments and teams tend to work in isolation with little or no connectivity, operating to inefficient business processes, resulting in poor decision making for the business.

The Team Konnect Rapid Application Development Platform has been designed to bridge the gap between your business process needs and your application development requirements. This is achieved by providing you with a highly customisable no-code environment, empowering you to build out a suite of connected business applications that collectively fashion the ideal solution for your business, all at incredible speed.

## SIMPLER, SMARTER AND MORE RELIABLE APPS

Team Konnect is a suite of highly flexible building blocks that enables any organisation to build complex business process solutions in days instead of months.

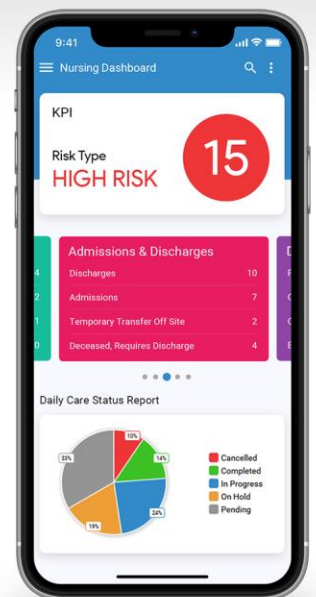

Create your very own custom business applications, and instantly enhance them using any of our built-in features such as task management, job scheduling, document management, video's and photos' compliance checklists, instant messaging or any of the other 20 pre-configured features available.

Map out business processes to deliver targeted instructions using triggers, alerts or complex decision making rules and secure access using permissions, custom roles and robust industry standard single sign-on security.

And finally, Go Mobile, using our native iOS or Android mobile applications with versions of your business applications that are built instantly to collect and store data locally, even working in 'offline mode'

Why not contact us today for a demonstration of our incredible Team Konnect Enterprise platform.

# RAPID APPLICATION DEVELOPMENT TEAM KONNECT

## TASK MANAGEMENT

Our Team Konnect platform comes with an open connected Task Management module allowing information to flow freely among everyone within the organization.

## JOB SCHEDULE MANAGEMENT

The Team Konnect Job Scheduling Module has been designed to operate as an interactive application between managers and their teams of resources.

## CHECKLIST MANAGEMENT

With our Team Konnect Checklist Module, it takes just a few minutes to turn your paper forms into intelligent, interactive mobile forms that work with your mobile devices.

## COMPLIANCE MANAGEMENT

The Team Konnect platform comes with a highly customisable Compliance Management Module that allows organisations and their managers to plan, organise, control, and lead activities that ensure compliance with the laws and standards within which they operate.

## INCIDENT MANAGEMENT

Team Konnect includes a comprehensive Incident Management Module that operates to ITIL industry standards where the main objective is the restoration of services as quickly as possible after an incident has been reported.

## CONTRACT MANAGEMENT

The Team Konnect Contract Management Module enables organisations to proactively manage the wide range of contracts created with customers, vendors, partners, or employees annually.

## ASSET MANAGEMENT

The Team Konnect Asset management module is a centralised system that allows your organization to track important details about each asset they manage in real time.

## SALES PIPELINE MANAGEMENT

The Team Konnect Sales Pipeline Module provides organisations with the perfect method to define their sales pipeline process from first contact with a prospect, through to closing the sale and every step in between.

## PURCHASE ORDER MANAGEMENT

Our Team Konnect Purchase Order Module enables organisations to seamlessly control the purchasing of products and services from external suppliers.

## SALES ORDER MANAGEMENT

Our Team Konnect Sales Order Module helps organisations to efficiently track and fulfil all customer orders creating a positive customer experience.

## STOCK CONTROL MANAGEMENT

The Team Konnect Stock Management Module has been designed to simplify the management of stock within organisations of all types and size.

## WAREHOUSE MANAGEMENT

The Team Konnect Warehouse Management module (WMS) helps organisations optimally manage stock control, across multiple locations, multiple warehouses, multiple branches, isles, positions and down to bin locations.

## PICK & DISPATCH MANAGEMENT

The Team Konnect Dispatch Management Module optimises an organisations dispatch schedule during the day with real-time information both from the field and from customers.

## MOBILE DELIVERY MANAGEMENT

The Team Konnect Mobile Delivery Management module is a simple and easy to use solution that will help manage exceptions in real-time, improve efficiency and enhance the service experience for your customers.

## BARCODE SCAN MANAGEMENT

The Team Konnect Platform incorporates Barcode Scanning which can be enabled across a wide variety of modules for different purposes.

## SINGLE-SIGN ON

Integrate with your organisational Active Directory or Office365 Tenant for secure single sign on functionality
