

TEAM KONNECT - TASK MANAGER

Get it Done!

TASKS - RESOURCE MANAGEMENT AT ITS BEST

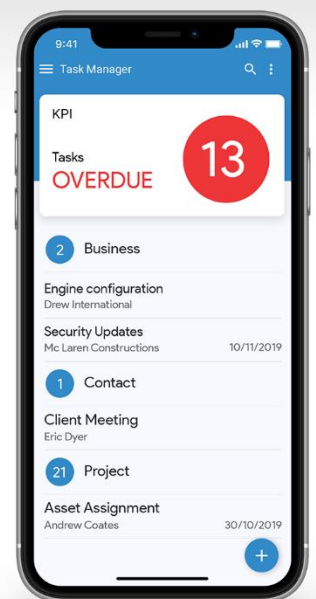

Task management is more than the creation of to-do lists. Its about tracking tasks from beginning to end, delegating subtasks to teammates, and setting deadlines to make sure everything gets done on time.

Task management is all about reducing time spent on tedious manual tasks, simplifying workflows, reducing errors, to ultimately saving you time for solving more important problems.

The Team Konnect Task Management platform has been designed to empower your teams to work more productively and efficiently using effective task management.

Why not contact us today for a demonstration on our incredible Team Konnect Task Management platform.

RAPID APPLICATION DEVELOPMENT PLATFORM

TEAM KONNECT

TASK MANAGEMENT

Dynamic task creation enables you to schedule, control and manage all aspects of daily interactions with your customers and employees

JOB SCHEDULE MANAGEMENT

Escalate successful opportunities by converting them to jobs to include all information and assets relating to the work required

CASE MANAGEMENT

Capture customer helpdesk requests and convert these into active cases for resolution in line with your SLA contracts

CONTRACT MANAGEMENT

Monitor your complete range of equipment and services sold for modifications and alerts of contract and warranty expirations

SALES ORDER MANAGEMENT

Generate and manage all your customer sales orders, along with product selections and monitor thorough picking, packing, right through to collection or delivery.

PURCHASE ORDER MANAGEMENT

Generate and manage purchase order records for all your suppliers using our product lookup tables for product and pricing information

CHECKLIST MANAGEMENT

Dynamically create your checklists for vehicle walk around, risk assessments, etc for assignment and completion on mobile devices

PIPELINE MANAGEMENT

Capture all your business leads and opportunities within our visual pipeline and measure these against sales resource targets

STOCK CONTROL MANAGEMENT

Enable your resources to update stock levels by accepting product deliveries including electronic signature capture and photographic evidence

WAREHOUSE MANAGEMENT

Create your own unique warehouse storage structure based on locations, buildings, isles, levels, pallet positions scanning all goods into unique locations for goods inwards and dispatch management.

MOBILE ORDER MANAGEMENT

Provide mobile sales resources with the tools to capture customer orders from the field for immediate processing and dispatch

ORDER DELIVERY MANAGEMENT

Manage and schedule daily deliveries for picking, packing and dispatch onto your fleet of internal vehicles or integrate with external contractors

KNOWLEDGEBASE MANAGEMENT

Maintain your most valuable company assets by creating a Knowledge Management repository for categorising, storage and retrieval of vital company information contributions from across the whole company

TRAINING & COMPLIANCE MANAGEMENT

Create a companywide training and compliance repository where staff can access role based training materials and management can monitor and verify progress through personalised training programmes

PROJECT MANAGEMENT

Create departmental based projects and collaborate in teams, while managing resources, assigning tasks, sharing documentation and monitoring your project progress in real-time

SHAREPOINT INTEGRATION

Team Konnect integrates with Office365 SharePoint allowing single sign-on using existing SharePoint accounts along with file storage capabilities

ACTIVE DIRECTORY INTEGRATION

Team Konnect can integrate with Azure Active Directory (AD) and Office365 to provide industry standard security and Identity Management
